

## **Sava lifting air bags from GAAM**

GAAM Emergency Products distributes Sava's pneumatic high-pressure lifting air bags, which are designed to provide maximum lifting force in low clearance situations.

The lifting air bags are ideal for heavy-duty, low profile heavy lifting, emergency rescue, HAZMAT management and industrial use. This makes them highly suited for use during mine site emergencies such as a mine collapse or the rolling over of heavy vehicles and equipment.

Sava's heavy lifting air bags are both easy to use and feature a thin profile. The convex dimpled interlocking surface provides superior gripping power when two lifting bags are stacked on top of each other.

Sava's range of standard pneumatic lift air bags is further expanded with the addition of its heavier industrial lift bags. Custom engineered, these heavy lifting bags are for special purpose applications, such as heavy load shifting, dunnage, levelling or padded support, and available in 11 standard sizes with a lift capacity of up to 70 tonnes.

***About GAAM Emergency Products***

GAAM Emergency Products specialises in the emergency services market. Since 1933, Australian firefighters have relied on GAAM equipment to safely go about their daily operations. GAAM manufactures and distributes a range of petrol and diesel powered firefighting pumpsets and accessories. While based in Melbourne, GAAM also has offices in Sydney, and conducts business throughout Australia and New Zealand.
