## GAAM Corporate Profile

Emergency Products and Solutions

## Emergency products you can rely on

GAAM Emergency Products is a diversified company providing specialised equipment designed to meet the rigorous of emergency services and other industries operating in demanding environments.

Modern fire fighting, law enforcement and rescue response teams need access to an array of equipment so they can act quickly and decisively to fire and other emergency related events. GAAM's equipment choices are comprehensive, with a product suitable for just about every situation. We offer a wide range of products, including; fire fighting pumps, fire accessories, vehicle lighting and protective clothing and equipment.

## GAAM pumps – reliable and tough

Fire fighting pumps are used in extreme situations and must deliver pressure and flow as expected at all times. Failure to perform can literally be a matter of life and death, so we manufacture our pumps to the very highest standards. GAAM pumps are designed and manufactured with ease of use and simplicity of maintenance in mind.

## Tanks and mobile bladders

Getting water where it is needed is often a challenge in rugged and remote bushland. GAAM supplies a range of portable water storage reservoir tanks and helicopter buckets from Fireflex.

## Foam proportioners

Rather than water, a foam retardant needs to be applied to handle chemical and other blazes. The Quenchmaster and Foammaster proportioning units are easy to operate and deliver an accurate foam/water mixture.

## Forced entry tools

At times fire fighters, law enforcement officers and rescue personnel must force entry to deal with urgent situations. In these circumstances they need equipment that does the job quickly and effectively, like Paratech's Pry-Axe, Biel Tool, Hooligan Tool, Kelly Tool or Claw Tool.

## Hurst Jaws of Life

Hurst Jaws of Life has become synonymous with life saving rescue equipment. GAAM supplies the Jaws of Life range along with Hurst high pressure air bags.

## Nozzles and monitors

Nozzles and monitors are critical components in fighting fires. They need to be well suited to the type of fire likely to be encountered as well as being well matched to the flow and pressure characteristics of the pump. GAAM has an extensive range of nozzles providing different spray patterns, as well as nozzles for foam application.

## Thermal imaging

Thermal imaging cameras allow fire fighters to see what is happening inside the fire, even through thick, choking smoke. Bullard Thermal Imagers are incredibly tough and deliver clear images so that fire fighters can make informed decisions.

## Helmets

Bullard helmets are manufactured from high heat thermoplastic that continues to provide protection even after repeated heat exposure. The low centre of gravity provides a balanced and stable fit.

## Cooling vests

Isotherm is a revolutionary technology that offers more cooling, lasts longer and is more comfortable than any other cooling product on the market. Isotherm vests help reduce the chance of heat-related illnesses often experienced when working in extreme environments.

## Riot equipment

GAAM supplies a full range of equipment for riot response including helmets with visors, batons, gloves and, shoulder, elbow and knee pads.

## Hale/Godiva fire pumps

Single or multi pressure pumps, for midship or rear mounting in the fire vehicle. Power Take Off (PTO) pumps designed by American and European specialists for use in the most arduous of conditions.

## Valves, hoses and couplings

Along with fire fighting water pumps, GAAM supplies an array of high quality valves, hoses and couplings to make sure water is delivered effectively from the pump to the seat of the fire.

## Light bars and rotating domes

A range of light bars and domes from Whelen can be supplied by GAAM. These feature high powered halogen and LED lights in a variety of configurations and sizes.

## Covert systems

Whelen covert lights are subtle and hidden until activated – then they are highly conspicuous. A variety of mounting options are available for permanent or temporary fixture.

## Sirens

GAAM supplies the Whelen range of sirens and speakers – a distinctive sound that gets attention. The siren amplifiers are available in a wide variety of installation configurations with a choice of features.

## Scene lights

Night owl systems from Woodway turn night into day in an instant. The system is quickly and easily fitted to most passenger 4 wheel drives with standard roof bars.

## Unrivalled expertise in emergency and extreme environments

Since 1933, Australian fire fighters have relied on GAAM equipment to bring fires under control. GAAM is a specialist in the design and manufacture of pumps for urban and rural fire suppression, manufacturing a wide range of petrol and diesel powered fire fighting pumpsets and ancillary systems.

## The best products from around the world

GAAM sources products and components specifically for fire, rescue, police, security, ambulance, SES and other emergency services and industrial organisations from suppliers around the world. Along with an extensive range of fire pumps, hoses, valves and nozzles our product range includes; riot equipment, rescue equipment, forced entry equipment and vehicle lights and sirens.

GAAM has supplemented its product range by becoming the exclusive Australian distributor for a variety of products made by icon companies such as: ALC, Bullard, Godiva, Hale, Hurst, Niedner, Nupla, Paratech, Sava, TFT, Whelen, Wildfire, Woodway and Visibility System Company.

## Our people; there to make your people more effective

There are many emergency products to choose from and matching a product to a requirement is not always easy. That is why GAAM's skilled and experienced professionals have such an important role. We take the time to understand in detail the nature of your work and the requirements of equipment in the field. We know there are often no second chances in your line of work, so we like to make sure the equipment we provide will do the job correctly the first time.

GAAM is one of the most experienced companies in the industry. Our people know what works and what does not. They are passionate about the equipment they work with and are happy to pass on their deep understanding of fire fighting and other equipment to you. The better informed you are, the better your equipment selections will be.

GAAM is part of Tyco International. This gives us access to suppliers of emergency services products across the world, so we can bring world's best practices and equipment to fire fighters, police, ambulance and other emergency workers in Australia.
